

EDUCATION

UC Irvine • B.S. in Computer Science w/ Honors, 3.9 / 4.0 GPA Sep 2024 – Jun 2026

- graduated in 2 years
- ICS Honors Program
- UROP Fellow
- Data Structures
- Algorithms
- Software Eng.
- Compilers
- Cryptography
- Formal Lang. & Automata
- Quantum Computation
- Distributed Systems

PROJECTS

Lambast • *Honors research project using Rust* Feb 2025 – ongoing

- Built a whole-program optimizing compiler for untyped λ -calculus.
- Presented preliminary research at UCI Undergraduate Research Symposium.

Checkers AI • *class project using Python, C++, Shell* Sep 2025 – Dec 2025

- Built Checkers AI with partner using **Monte Carlo techniques**.
- Created auxiliary **Python** and **Shell** scripts for testing, benchmarking, and profiling.

Misc. websites • *personal projects using Svelte, TS, Tailwind, GitHub Pages* 2023 – 2024

- Reduced served asset sizes by **58-70%** via precompilation and WebP compression techniques.
- Implemented directional page transitions with **View Transitions API** and **Svelte** transitions.
- Statically hosted Wordles; integrated seedable PRNG to select “answer of the day” w/o backend.

SKILLS AND INTERESTS

Proficient in Rust, C / C++, JS / TS, Python, Svelte, Tailwind.

Familiar with Git, HTML / CSS, Nix, LaTeX, Typst, Unix systems & shells.

Acquainted with most mainstream languages, e.g., C#, Go, Haskell, Java, Lua, Ruby, SQL.

Research interests $\approx$ programming language design & theory.

EXPERIENCE

Learning Assistant • UC Irvine Mar 2025 – ongoing

- Delivered effective supplementary pedagogy for **Python** and upper-div **Algorithms**, e.g., alternate explanation of Master Theorem.
- Spearheaded study sessions to identify and guide students through gaps in understanding.
- Coordinated with professors via weekly meetings to enhance student learning.

Intern • LGBTQIA+ Identity Commission @ UC Irvine Oct 2024 – Jun 2025

- Facilitated outreach efforts to students and orgs in collaboration with 8 other interns.
- Led a team of 3 to organize and host themed Gayme Show™.

Programmer • Video Game Development Club @ UC Irvine Sep 2024 – May 2025

- Worked with team of 13 to create typing game in **C#** and **Unity**.
- Led dev of main UI window, e.g., responsive user input handling and real-time feedback.
- Leveraged **Git** and **Trello** to streamline collaboration between departments.
