# Winston Li

Updated on Oct 12, 2026.

liwy3@uci.edu • (925) 588-6740 • winstonyli.github.io • winstonyli on GitHub and LinkedIn

*Builds systems from scratch across PL, ML, and the web.*

## Education

**UC Irvine** • B.S. in Computer Science w/ Honors, 3.9 / 4.0 GPA — Sep 2024 – Jun 2026

- graduated in 2 years • ICS Honors Program • UROP Fellow
- Data Structures • Algorithms • Software Eng. • Compilers • Cryptography
- Formal Lang. & Automata • Quantum Computation • Distributed Systems

## Projects

**manifold** • *Rust, wgpu, CEF, Servo* — Sep 2026 – Present

- Built an 80k-line browser running each tab in its own engine process (Blink via CEF/WebView2, Servo, WebKitGTK) over IPC, with in-place engine hot-swap.
- Added crash recovery, journaled sessions, and a force-directed tab graph on **wgpu**.

**scratchtape** • *Rust, wgpu, cubecl* — Sep 2026 – Present

- Built an ML engine from scratch (autodiff, layers, GPU backend); every primitive is gradient-checked.
- Measured DX12 at 1.6–5.8× lower overhead than Vulkan on small matmuls; up to 900 GFLOP/s.

**tatic** • *Rust, WebAssembly* — Mar 2026 – Present

- Built a **JIT** caching compiled **WebAssembly** by content hash; fixed a leak found by benchmark.

**cereal** • *C99* — Sep 2026 – Present

- Wrote a C99 front end and language server; matches gcc-13 on 3,908 of 3,910 runnable gcc.dg tests.

**Apps & web** • *TypeScript, Svelte, Tauri* — Sep 2026 – Present

- **arrow-game**: strict-TS browser roguelite, no runtime dependencies; 400+ tests on Bun, Node.
- **lollipoppy**: Tauri (Rust) + Svelte desktop app that drives the League client.

## Skills and interests

**Proficient** in Rust, C / C++, JS / TS, Python, Svelte, Tailwind.

**Familiar** with Git, HTML / CSS, Nix, LaTeX, Typst, Claude Code, Unix systems & shells.

**Acquainted** with most mainstream languages, e.g., C#, Go, Haskell, Java, Lua, Ruby, SQL.

**Domains:** compilers & PL, ML & GPU compute, browsers, web & desktop apps, developer tooling.

## Experience

**Learning Assistant** • UC Irvine — Mar 2025 – Jun 2026

- Delivered supplementary pedagogy for **Python** and upper-div **Algorithms,** e.g., Master Theorem.
- Spearheaded study sessions to identify and guide students through gaps in understanding.

**Intern** • LGBTQIA+ Identity Commission @ UC Irvine — Oct 2024 – Jun 2025

- Led a team of 3 to organize and host themed Gayme Show™.

**Programmer** • Video Game Development Club @ UC Irvine — Sep 2024 – May 2025

- Worked with team of 13 to create typing game in **C#** and **Unity**; led dev of the main UI window.
